MathWorks®

Pocket AI and IoT – STEM for Her

Pre-work Instructions

Hardware and Software Requirements

To participate in this workshop, you need:

- A charged phone or tablet with Android 8.0 or later, or iOS 13 or later.

Need Help?

If you have trouble with the setup, please ask one of the MathWorkers for help.

Create a MathWorks Account

Visit the following link https://tinyurl.com/createmwacct, to create a MathWorks account!

Part I. Activate the workshop license and create a MathWorks Account

1. In a browser window, visit https://tinyurl.com/MLforstemforher

   If you cannot access tinyURL, use this link:
   https://www.mathworks.com/licensecenter/classroom/4633452/

   To create a MathWorks Account, click **Create Account** at the bottom of the page on your mobile device. Fill out the form with the required information. You need access to the email you use to create the account.
   Use a personal email address to create the account. Do not use your work or university email to create the account.

2. Follow the instructions to verify your MathWorks Account.
3. Go back to the browser window to finish creating your MathWorks Account.
   - You must check the **Online Services Agreement** box.
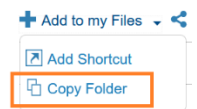

Part II. Access the exercise files

1. Go to https://tinyurl.com/PocketAIExercisesforStemforHer
   Click the **"Add to my Files"** button next to the plus sign and then select **"Copy Folder"**.
2. If you cannot access tinyURL, use this link:
   https://drive.matlab.com/sharing/3c6dd1e4-137b-43e0-a381-0485e828e435/
3. If you aren't already logged into your MathWorks Account in the browser window, log in.

Part III. Download and connect to MATLAB Mobile

Download and connect to MATLAB Mobile using your mobile device.

1. On your device, visit https://www.mathworks.com/products/matlab-mobile.html.
2. Click the **Google Play** or **App Store** link and install the app.
3. Open the app and click '**Connect to MathWorks Cloud**'
4. Log in using the MathWorks Account you created.

Using MATLAB Mobile for the Pocket AI and IoT Workshop

If you have the MATLAB Mobile app, log in. To log in,

1. Tap the menu bar and then tap your username

2. Use the document specific to your operating system to get setup further.
